I IT Security I Consultancy I Operations I

WHO WE ARE?

WE;

- Founded in 2001, based in İstanbul, Turkey.
- Have security, availability solutions from IBM, Symantec, Veritas, Bluecoat, Hitachi, Transvault, HPE and Veeam.
- Are providing consultancy, maintenance and operational support.
- Awarded by IBM as “Top Partner in Security Intelligence” within MEA (Middle East & Africa) Region.

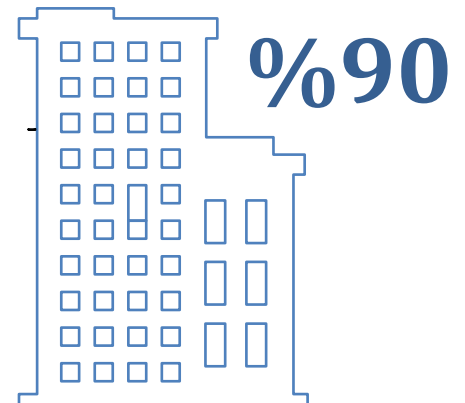

HOW WE CAN HELP?

- Our services are beginning with understanding our client’s needs. Our solutions are provided according to these needs and if necessary by technology proven demoS or PocS (Proof of Concept). We are happy to provide up to 2 hours of SLA on open tickets.
- Our solutions provided by solution design, implementation, support, periodical support and operational support remotely.

“As of 2016, we have approximately %90 market share of local Qradar market in Turkey. We would like to help companies in EMEA by our sectoral experience, security expertise and competitive offerings via our local partnerships”

Ayhan Bamyacı, CEO, Platin Bilişim

WHAT WE DO?

“Security Intelligence”

Cyber Security starts with understanding what’s going on around. IBM’s Qradar solution is a leader SIEM solution that providing qflow/netflow visibility, vulnerability management and incident forensics solution.

“Enterprise Backup”

Data is taken into account as a new “natural resource” nowadays hence “data” is very valuable resource and needs protection. Platin Bilisim provides data protection solutions via special hardware (OEM-appliances, VTL boxes), leading software and professional services. Veritas Netbackup, Netbackup Appliances, Veeam, HPE Store Once are the vendors that we design our solutions with.

“Endpoint Security”

End users are the most important players in the security circle. Mobilization is a challenge for the companies on IT Security issues. All the mobile protocols of PCs need to be protected. Platin Bilisim provides IBM, Symantec, Bluecoat solutions to procure higher security for your endpoints. Antivirus, malware, antispam, encryption, DLP, proxy management, software distribution, compliance, reporting, patch management, remote control are some of our solutions assured.

“Enterprise Security”

In today’s business challenges IT security is a vital need for organizations. Platin Bilisim co-works with Symantec, Bluecoat and IBM to provide enterprise security solutions. Not only protecting your network and internet systems, servers, sensitive data, secret codes but also auditing usages of the various Enterprise Security aspects. Legal compliance needs such as regulation authorities of telcoS, force organizations to have Enterprise Security solutions. Many different companies plan or have ISO 27001 or PCI-DSS certifications to protect their sensitive data. Platin Bilisim helps their clients by providing “tools” for the security standards told.

“Archiving”

File, email, SharePoint portal data is growing from day to day. Psd files needs to be protected and controlled. Platin Bilisim provides Veritas Enterprise Vault and Hitachi Content Platform to solve compliance and storage issues.
